-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 15, and 25 rejected under 35 U.S.C. 103(a) as being unpatentable over Specht et al (5,985,362) in view of Klapper et al (5,312,848). Specht et al disclose a hydrophobic foam structure to fit between an adjacent pair of frames, compression fitting at least one layer of the foam between frames so that the layer substantially covers at least one of a plurality of stringer, and coupling a trim piece over said layer such that said layer is sandwiched between said trim piece and said outer skin (see Figures 3 and 4). Specht et al teach every aspect of the present invention except wherein the hydrophobic foam structure is open celled. Klapper et al discloses that it is well known in the art to use open celled foams for insulating aircrafts. (see abstract). It would have been obvious at the time of the invention to one having ordinary skill in the art to include the teachings of Klapper et al into the invention of Specht for the purpose of decreasing overall aircraft weight.

Art Unit: 3644

Allowable Subject Matter

3. Claims 2-14, and 16-24, and 26-35 objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
